PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building responsive and scalable web applications using MongoDB, Express.js, React.js, Next.js, and Node.js. Skilled in developing modern user interfaces, implementing REST APIs, authentication systems, and database integration. Strong understanding of JavaScript, TypeScript, responsive design, and web performance optimization. Passionate about creating clean, user-friendly applications and continuously learning modern web technologies to deliver high-quality solutions.

PROJECTS

SNITCH

REACT • EXPRESS • MONGODB • REDIS • REDUX • IMAGEKIT • RAZORPAY

SNITCH is a full-stack fashion e-commerce platform. Designed with separate buyer and seller experiences, it offers features such as wishlist management, secure checkout, order tracking, inventory management, seller analytics, and revenue insights. While building SNITCH, I focused on creating a scalable architecture, reusable component systems, responsive user interfaces, and production-oriented backend workflows. This project strengthened my understanding of real-world application development, performance optimization, system design, and the challenges involved in transforming an idea into a complete product.

RESUME BUILDER

NEXT JS • TYPESCRIPT • TAILWIND CSS • FRAMER MOTION

Built an AI-powered Resume Builder that enables users to create professional, ATS-optimized resumes through an intuitive and responsive interface. Integrated AI assistance to generate tailored summaries, skills, and work experience content, improving resume quality and reducing manual effort. Developed features including real-time resume preview, multiple customizable templates, secure data persistence, and PDF export. Focused on delivering a seamless user experience while leveraging modern full-stack technologies and AI capabilities.
